

## Raw particleboards

Woodeco raw particleboards are the contemporary alternative to solid wood. They are lighter, better to work and have constant properties. With its chipboard range, Woodeco offers high-quality core solutions for all kinds of different requirements. Raw particleboards also offer benefits for the environment. This is mainly apparent with regard to their sustainability aspects. Chipboards or particleboards are made from wood chips, wood by-products or other renewable raw materials. On request, they are PEFC™ or FSC® certified (licence code: FSC-C018711).
